

[FROM NATURAL LIFE TO ADD VITALITY]

CATTLE、 SHEEP、 HORSE LICK BRICKS

GREEN, HEALTHY AND NUTRITIOUS

[GOOD INGREDIENTS COME FROM GOOD BRICKS]

THE COMBINATION OF VITAMIN E AND SELENIUM IN LICK BRICKS CAN EFFECTIVELY PROMOTE ESTRUS, PREVENT THE AFTERBIRTH, PREVENT BREAST INFECTIONS
COMMON DISEASES SUCH AS ROOM INFLAMMATION, THROUGH ITS REGULATION, CAN MAKE ANIMALS ACHIEVE THE BEST PRODUCTION STATE.

IT IS RATIONALLY EQUIPPED WITH A VARIETY OF TRACE MINERALS ESSENTIAL FOR ANIMAL HEALTH AND PRODUCTIVITY.
SAFELY INCREASES THE CONTENT OF SELENIUM, WHICH IS RELATIVELY DEFICIENT IN PASTURE AND FORAGE.
THE CONTENT OF COBALT, WHICH CAN PROMOTE APPETITE AND INCREASE MILK PRODUCTION. ANIMALS CAN LICK IN MODERATION ACCORDING TO THEIR OWN NEEDS.

Main ingredients:

Organic selenium, SOD powder, table salt, fortified selenium, magnesium oxide, iron, copper, cobalt, zinc, manganese, calcium, phosphorus, sodium, sulfur, vitamins, etc.

Features:

Vitamin E and selenium in SOD lick bricks work together to effectively promote estrus, prevent afterbirth, mastitis and other common diseases.

Its regulation can make the animal reach the best production state.

It is rationally equipped with a variety of trace minerals essential for animal health and productivity.

Safely increases the content of selenium, which is relatively deficient in pasture and forage.

Cobalt element that can promote appetite and improve milk production content. Animals can lick in moderation according to their own needs.

Technical efficacy:

Increase immunity: organic selenium and SOD powder contained in sod lick bricks can scavenge free radicals in the body, eliminate toxins, antioxidants, energy

Effectively inhibit the production of lipid peroxides, prevent blood clots, clear cholesterol, and enhance the immune function of cattle and sheep.

1. Increase feed intake by 10%-20%.
2. Animal weight gain is increased by 10%-25%.
3. The lactation period and the utilization period are extended by more than 20%.
4. It contains organic mineral elements with high utilization rate, and can produce iron, zinc and selenium-rich health milk, etc.
5. Significantly reduce sheep stress response.
6. Enhance the fertility of animals and promote the healthy development of the fetus.
7. Prevent pica, such as eating feces, licking urine, etc.
8. Reduce rickets, osteomalacia, hoof rot, cracked hoof, multiple infertility, miscarriage, stillbirth, unborn child, breast dysplasia, Incidence of mastitis, postpartum hypogalactia, postpartum paralysis, and rough coat.
9. The effect of detoxification, detoxification and liver protection!

The correct way to use SOD lick bricks:

1. Ruminants should lick as many bricks as possible. For example sheep, at least one SOD lick brick for every 20 sheep. SOD licking bricks should be placed in places with sufficient water sources as much as possible. If the placement of SOD licking bricks is not enough, it will lead to direct competition between livestock, and weaker livestock may be not getting enough licks, resulting in insufficient intake.
2. The SOD licking brick is 30-50 cm away from the ground, fixed on the place where the cattle and sheep will be licked, and licked freely.
3. The SOD licking brick must be kept clean, and the matching licking block box is appropriate.

Implementation standard:

Product Specifications:

A box of four, a piece of ten pounds, carton packaging built-in foam compartment.

Shelf life:

Three years
